9 July 1956

MEMORANDUM FOR: Project Director of Materiel

SUBJECT : Release of Two Butler Buildings, Adana, Turkey
Property of Project 119L

1. During my recent visit to Adana, Turkey, [redacted] USAF, Commanding Officer of the USAF personnel at Incerlik Air Base, requested that I take up with [redacted] USAF, in the Office of the Director of Materiel for USAF Headquarters, the question of releasing to [redacted] two Butler buildings which were erected earlier this year for Project 119L.

2. At the present time, one of these two Butler buildings is in use for the storage of Project AQUATONE property, namely, office furniture. [redacted] would like to have both of these buildings as soon as possible in order that he may use one for a receiving and shipping point and the other for the storage of his PX materials, which are presently being housed in the inadequate space devoted to the APEX store in the large mess hall.

3. I was unable to take this matter up with [redacted] at the time I saw him last week in Wiesbaden, and would therefore appreciate it if you would consider the possibility of passing this information on to [redacted] at the time of your next communication with him. I assume that, upon the arrival of the nine Butler buildings destined for this Project at Adana, the question of releasing two Butler buildings, as described above, could be resolved more equitably since we will then have a considerable amount of room in which to move and to store our equipment.

JAMES A. CUNNINGHAM, JR.
Director of Administration
